

Shaimaa Elfeqi

Data Analyst & Machine Learning Engineer

shaimaaelfeqielfeqi@gmail.com — +20 110 588 2870 — [LinkedIn](#) — [GitHub](#) — [Kaggle](#) — Kafr El Sheikh, Egypt

Summary

Data Science and AI student with hands-on experience in building end-to-end machine learning and data analysis solutions. Skilled in transforming raw data into actionable business insights, developing predictive models, and designing interactive dashboards. Experienced through internships, academic projects, and full-stack development, with a focus on delivering data-driven impact and solving real-world problems using AI and analytics.

Education

B.Sc. in Bioinformatics & Artificial Intelligence

Kafr El Sheikh, Egypt

Faculty of Artificial Intelligence, Kafr El Sheikh University

Expected 2028

Experience

Data Science & AI Intern

Mar 2025 – May 2025

EVA Group Limited

Cairo, Egypt

- Developed an AI-driven supply chain allocation system to optimize inventory distribution across branches under real-world constraints.
- Applied Linear Programming and Python-based data analysis to minimize stockouts, improve service levels, and optimize logistics decisions.
- Processed demand, inventory, transport cost, and branch capacity data to generate constraint-aware shipment plans.

Student Mentor — Data Science & ML Workshops

Sep 2025 – Present

Academic Program

Egypt

- Delivered technical workshops on machine learning and data science fundamentals to junior students.
- Explained core concepts in plain language and guided beginners through hands-on exercises and projects.
- Contributed to session preparation, curriculum organization, and Q&A facilitation.

Freelance Data Analyst

Jun 2025 – Present

Independent

Remote

- Delivered end-to-end data analysis and machine learning solutions for real-world datasets and practical problems.
- Built predictive models, conducted exploratory analysis, and extracted actionable business insights.
- Designed interactive dashboards and visual reports to communicate findings to non-technical stakeholders.

Projects

Automatic Allocation of Received Goods | Python, Linear Programming, Pandas

Mar 2025

- Built an AI-driven supply chain system to optimize inventory distribution across branches under real-world business constraints.
- Applied Linear Programming alongside Python data analysis to reduce stockouts, improve service levels, and streamline logistics.
- Integrated demand forecasts, transport costs, and branch capacity data to generate optimized, constraint-aware shipment plans.

Future Self Simulator | HTML, CSS, JavaScript, Node.js, Express.js, SQL Server, JWT

2025

- Developed a full-stack web application that simulates users' future career growth by tracking skills, goals, and learning progress over time.
- Designed and implemented a relational database to manage users, goals, skills, learning plans, and progress tracking records.

- Built a secure authentication system using JWT with role-based access control and RESTful APIs for all CRUD operations.
- Implemented a scenario engine to estimate learning outcomes, success probability, and risk levels based on user activity data.
- Created a dynamic "Future CV" feature that predicts career progression based on tracked performance and learning history.

Customer Churn Prediction | Python, Scikit-learn, Pandas, Matplotlib

2024

- Built a classification model to predict customer churn in the telecom industry using multiple machine learning algorithms.
- Performed end-to-end preprocessing including missing value handling, categorical encoding, and feature scaling.
- Applied hyperparameter tuning and evaluated models using Accuracy, Precision, Recall, F1-Score, and ROC-AUC.

BMW Car Sales Analysis | Python, Pandas, Plotly, Power BI

2024

- Analyzed BMW car sales data to uncover pricing trends, market segments, and regional sales performance patterns.
- Performed comprehensive data cleaning, feature engineering, and EDA with interactive Plotly visualizations.
- Built an interactive Power BI dashboard presenting key business KPIs and data-driven sales recommendations.

E-Commerce Market Sales Analysis | Python, Pandas, Seaborn, Power BI

2024

- Analyzed large-scale e-commerce sales data to identify top-performing categories, seasonal trends, and customer behavior patterns.
- Built interactive dashboards to visualize revenue, order volumes, and product performance across different regions.
- Delivered actionable insights to support strategic pricing, inventory planning, and marketing decisions.

Robotics & Embedded Systems | Arduino, C++, Sensors

2024

- Developed an embedded systems project integrating multiple sensors and actuators for automated real-time control.
- Participated in the Robotics Competition at Mansoura University – Engineering Plaza.
- Programmed microcontroller logic for real-time data acquisition, signal processing, and automated system response.

Superstore Sales Performance Dashboard | Power BI, DAX

Oct 2025

- Built a multi-page interactive Power BI dashboard to analyze retail sales, profit, and customer behavior for a large-scale e-commerce dataset.
- Formulated advanced DAX measures to compute key KPIs including Total Sales, Net Profit, and Profit Margin percentages.
- Designed comprehensive visualizations (Scatter charts, Ribbon charts, Treemaps) to identify seasonal patterns, regional profit drops, and trend correlations.
- Implemented dynamic page navigation and conditional formatting to enhance UX and automate anomaly detection alerts.
- Delivered an Executive Summary view with actionable insights tailored for director-level strategic decision-making.

Technical Skills

Languages:	Python, C++, SQL, JavaScript
Data Analysis & Viz:	Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Excel
Machine Learning:	Scikit-learn, XGBoost
Web Development:	HTML, CSS, Node.js, Express.js, REST APIs
Databases:	MySQL, MongoDB, Microsoft SQL Server
Tools:	Jupyter Notebook, VS Code, Git & GitHub, Streamlit
Bioinformatics:	BLAST, EXPASY, FASTA

Competitions & Achievements

- Best Member — ML & AI Student Activities Program
- Participant — ACPC (Africa & Arab Collegiate Programming Championship)
- Participant — Robotics Competition, Mansoura University – Engineering Plaza

Certifications

- Machine Learning & Data Analysis — Online Training, Jun 2024
- Python for Data Analysis — Online Training, Sep 2024
- Kaggle Learning Certificates — Kaggle, Dec 2024 – Mar 2025
- Data Science & AI Internship Certificate — EVA Group Limited, May 2025
